PROFESSIONAL SUMMARY

Computer Science undergraduate at NSUT with experience in Machine Learning, Deep Learning, MLOps, Cloud Computing, Data Structures & Algorithms. Developed end-to-end AI and MLOps systems using TensorFlow, Kubernetes, AWS, Docker, MLflow, and DVC, with experience in scalable model deployment, experiment tracking, and CI/CD.

EDUCATION

Course	College / University	Year	CGPA / %
Bachelor of Technology in Computer Science and Engineering	Netaji Subhas University of Technology, New Delhi	2023–2027	7.90
CBSE Board Class XII	Tagore Academy Public School, Faridabad	2022	91.6%
CBSE Board Class X	Tagore Academy Public School, Faridabad	2020	95.2%

PROJECTS

- **Multimodal Alzheimer's Disease Classification using Deep Learning** — Jan 2026 – Apr 2026 | GitHub
  Technologies: Python, TensorFlow, CNN, MLP, Deep Learning, Computer Vision, NumPy, Pandas
  - Built an end-to-end multimodal pipeline by integrating 8,000+ fMRI scans with clinical and cognitive assessment data from ADNI datasets.
  - Designed a custom Squeeze-and-Excitation CNN with attention mechanisms and class-weighted learning along with a 10-model MLP ensemble, achieving 94.28% accuracy on neuroimaging-based classification.
  - Implemented dynamic label alignment and weighted probabilistic late-fusion, achieving a 97%+ classification accuracy on unseen multimodal patient cohorts.
- **Cloud-Native MLOps Pipeline** — May 2026 – June 2026 | GitHub
  Technologies: Python, Scikit-learn, MLflow, DVC, Docker, Kubernetes, Flask, GitHub Actions, AWS, Prometheus, Grafana
  - Designed and deployed an end-to-end MLOps pipeline with DVC, MLflow, Flask, and Scikit-learn for model training, reproducible data versioning, experiment tracking, and evaluation.
  - Built modular machine learning workflows covering data ingestion, preprocessing, feature engineering, model registration, and automated pipeline orchestration using DVC.
  - Containerized the application using Docker and implemented CI/CD with GitHub Actions, deploying images to AWS ECR and orchestrating scalable deployments on Amazon EKS (Kubernetes).
  - Integrated Amazon S3 for artifact storage and Prometheus-Grafana for monitoring, delivering a production-ready cloud-native ML system with end-to-end observability.

ACHIEVEMENTS

- Secured **All India Rank 7622** in JEE Mains (Top 0.6% nationwide).
- Qualified JEE Advanced (AIR 15,000) | Math Olympiad International Rank 2462.
- Solved 300+ problems on LeetCode and Codeforces with strong focus on Data Structures and Algorithms.
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Machine Learning, Computer Vision.

TECHNICAL SKILLS

- **Programming Languages**: C++, Python, Java (Basic), SQL
- **Machine Learning & AI**: Machine Learning, Deep Learning, Computer Vision, TensorFlow, Scikit-learn, OpenCV, NumPy, Pandas, CNNs, Feature Engineering, Model Evaluation
- **MLOps & Cloud**: MLflow, DVC, Docker, Kubernetes, GitHub Actions, CI/CD, Flask, REST APIs, AWS (EC2, S3, IAM, ECR, EKS)
- **Developer Tools**: Git, GitHub, VS Code, Power BI, Prometheus, Grafana
- **Core Computer Science**: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks
